

RUIDONG

WATER/GROUND SOURCE SCROLL
WATER CHILLER AND HEAT PUMP

RUIDONG GROUP

www.ruidonggroup.com

Ruidong Group Co., Ltd is one modern large-scale enterprise integrating design, production, sales and installation of central air-conditioning products.

Ruidong is located in Dezhou City, Shandong Province. The Beijing-Shanghai High-speed Railway and Beijing-Shanghai Expressway passing through the city, make Dezhou become a key coordinate of the national economic artery. The registered capital of the group is one hundred fifty five and a half million yuan, covering an area of 300,000 square meters and construction area of 180,000 square meters.

Main business coverage:

1. Host series:

- Water cooled series: centrifugal cold (hot) water unit, screw type cold water unit, screw type water (ground) source cooling and heating unit, scroll type water (ground) source cooling and heating unit.
- Air cooled series: screw type cold (hot) water unit, modular type cold (hot) water unit, mini type cold (hot) water unit, VRV series unit.
- Packaged Unitary unit: constant temperature and humidity unit, air (water) cooled unitary unit, dehumidification unit.

2. Direct expansion series: Rooftop packaged unit, ducted split unit.

3. Terminal series: Purification air handling unit, combined air handling unit, fresh air unit, fan coil unit series.

ENTERPRISE PROFILE

4. **Ventilation series:** Fire exhaust fan, roof fan, axial fan, diagonal fan, centrifugal fan, etc.
5. **Engine room equipment:** cyclone sand remover, water separator (separator), decontamination device, demineralized water device, plate heat exchange unit, constant pressure equipment, etc.
6. **Air conditioning accessories:** All kinds of fire valves, regulating valves, tuyere series.
7. **Other products:** Low-temperature industrial chillers, air-conditioning equipment for planting and breeding industries.

The R & D team composed of high-tech talents will continue to introduce new products, advanced production equipment and adopt the international ISO9001 quality management system as a strong guarantee for product quality. Precision testing equipment and rigorous testing methods are the fundamental insurance of quality and are timely and thoughtful. After-sales service solves the problems that may arise in use for you.

The company has established a complete sales and service system. Set up offices in 18 cities including Beijing, Tianjin, Shanghai, Xi'an, Shenyang, Chengdu and other cities to provide users with timely, efficient and high-quality pre-sales, sales and after-sales services.

Ruidong Air Conditioning wishes you: Cooling air for propitious summer, spring returns with warm air from Ruidong.

CERTIFICATIONS

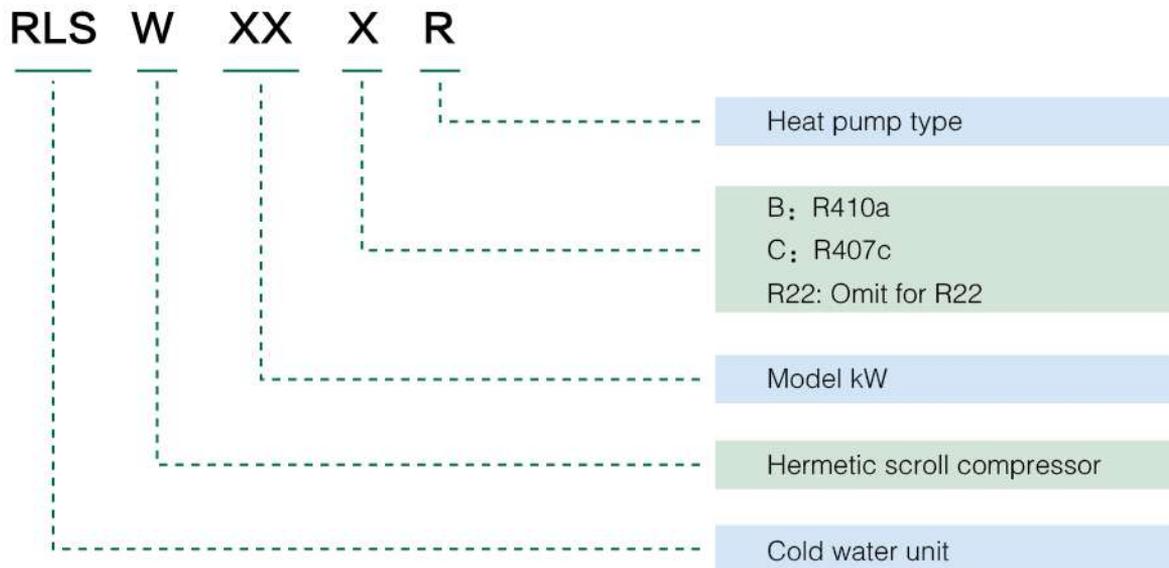

Ruidong group always takes "create first-class quality, offer sincere service" as the quality concept, builds customer-oriented quality management system, focuses on teamwork and insists on continuous innovation.

1. NAMING SCHEME

2. BRIEF INTRODUCTION

The unit uses scroll compressors, and the system consists of one to four compressors. Cooperate with high-efficiency shell and tube/plate condenser, evaporator and control system. This series of units is suitable for central air-conditioning systems such as general houses, villas, small restaurants, shops, hotels, KTV, office and commercial buildings.

1. Compressor characteristics and components

The scroll compressor itself has excellent anti-liquid impact ability. After installing the oil heating device, it can effectively prevent the machine failure caused by insufficient oil-fluorine separation during operation.

2. High-efficiency shell and tube/plate evaporator and condenser, with high heat exchange efficiency.

3. Control system

Including starting device, overheating protection device and power supply protection. The microcomputer controller adopts well-known brand wide-temperature electrical components, which can operate reliably at an ambient temperature of -15°C to 65°C . It has perfect automatic control function, equipped with RS-232, RS-485 standard communication interface, which can realize remote control.

4. Control method

Microcomputer control features:

- (1) Control the chilled water host with the cold water return water or outlet water temperature.
- (2) When the load reaches the set stop value of the unit, it will automatically stop and start automatically.
- (3) LCD display screen.
- (4) Inlet and return water temperature display and setting, operating status, compressor operating time.
- (5) Accept remote start and stop signals.

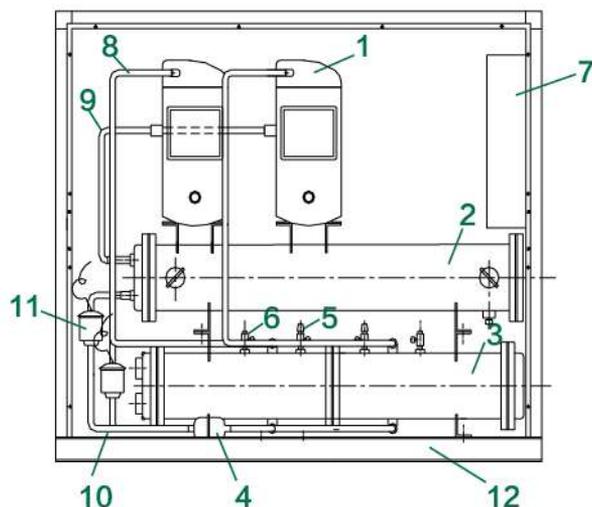

5. Safety facilities

- Safety valve
- High and low voltage switch
- Antifreeze temperature protection
- Oil heater
- Temperature control
- Pressure gauge
- Overload protector
- Power protector

6. Optional accessories

Built-in hydraulic module or separate hydraulic module

TESTING CENTER

Testing center covers an area of 6500 square meters; total investment of 50 million RMB, is the largest and most complete detection device in the north of China , the testing range is from household air conditioner to the centrifuge chillers.

Testing center adopt internationally renowned brand measuring instruments, including the United States Agilent data acquisition, Japan Yokogawa power meter, Saibi Ling platinum thermal resistance, to ensure the test accuracy.

Testing center can test multi-unit, air-cooled unit, fan coil unit, ceiling air handling unit, modular air handling unit, purifying air conditioning unit, water loop heat unit, air-cooled module chiller and air-cooled screw chiller.

MAIN PROJECTS

High school building in Brazil

Presidential palace of Kazakhstan

Shanxi Dingxiang County People's Court

Shanxi Yuncheng odd Star Technology Co., Ltd

Beijing Grand Oriental Hotel

Shanxi Linfen High Speed Rail Station

Beijing Sihui building materials city

Shanxi Tongmei Group Zhangze Power Puzhou Power Generation Branch
